

Harrison College Ltd

Child Protection / Anti Bullying Policy

Review Date: September 2026
Next Review: September 2027

Nothing is more important than children's welfare. Children who need help and protection deserve high quality and effective support as soon as a need is identified. An incident is deemed a Child Protection issue whenever inappropriate contact or relationship between a child and either an adult or another child places them at risk emotionally, physically or sexually, or when a child is suspected of intending self-harm.

No one person can have a full picture of the child's needs, all different practitioners and services that encounter that child and their family should pay due regard to the responsibilities on them to share information with each other within the statutory frameworks. In order that organisations, agencies and practitioners collaborate effectively, it is vital that everyone working with children and families, including those who work with parents/carers, understands the role they should play and the role of other practitioners. Within this policy we will now refer to 'child' as student.

The purpose of the Harrison College Child Protection Policy is to make all staff properly aware of the role they play and in recognising the risks to our students to be able to prevent, or at least detect, report and process, any such occurrence in the correct manner. All staff will read and be aware of their duties under KCSIE and have read Part One of the latest document annually. Harrison College staff should maintain an attitude of 'it could happen here' where safeguarding is concerned and that abuse is abuse and will never be tolerated or passed off as banter. When concerned about the welfare of a student, staff should always act in the best interests of the student.

A further purpose of this policy is to raise awareness that students at Harrison College may be more at risk of harm from others, and of suffering bullying due to their SEN need, cognitive understanding, medical diagnosis, physical health conditions, communication barriers, mental health needs and peer group isolation. Staff are trained in this awareness, and students are educated on this within their PSHE and tutorial entitlements as well as through 1:1 interventions, mentoring and counselling therapy support processes.

This policy should be read alongside Harrison College's Safeguarding and Student Protection policy, SEND policy and PDBW policy. Harrison College is aware of, and complies with, the published arrangements set out by the local safeguarding partners. This policy takes account of the latest DfE KCSIE document, Working Together to Safeguard Children (2026), Children's Act (2004) and the Children's and Families Act (2014) when dealing with students on an individual basis. The 2010 Equality Act must be adhered to within this policy and college practice. Where there is a mental health issue alongside, then the vulnerability of the student will be considered, and the DSL will refer to the Mental Capacity Act and Code of Practice (2005) if applicable.

By implementing and enforcing robust anti-bullying policies that specifically address all types of harassment and ensuring all staff and students know how to report bullying and feel confident that their concerns will be taken seriously and acted upon promptly we are making it clear that there is a zero-tolerance approach to sexual harassment and sexual violence. This is essential to the success of this policy and creating an inclusive, anti discriminatory culture where racism and other forms of discriminatory behaviour are recognised, challenged and addressed as part of the college safeguarding responsibilities.

1. The Nominated Person

- 1.1 It is fundamental to College policy and propriety that any accusations or suspicions in relation to Child Protection issues be referred **immediately** to the member of staff nominated as Designated Safeguarding Lead (DSL). Gail Stonier is the nominated DSL. If the DSL is not available, staff should not delay, and they should seek the principal, or another senior leader designated with DSL or DDSL responsibility. Robust cover arrangements will be in place for periods of absence, illness, leave or other circumstances.
- 1.2 Further details on DSL responsibilities procedures and contact information can be found in our Safeguarding and Student Protection Policy (Section 9) and on display on our safeguarding notice board outside HC6.
- 1.3 After being made aware of the issue, the staff member should refer this to the DSL immediately and should not seek to further investigate such a matter in any way whatsoever, nor should they discuss the matter with any person other than the DSL.
- 1.4 The staff member and the DSL will, when speaking to the student(s) follow the basic principles for students disclosing abuse (see Harrison College Safeguarding and Student Protection Policy) and will also follow the guidelines set out in Part 5 of KCSIE 2026 (paragraph 529 onwards) for students disclosing sexual harassment or sexual violence and peer on peer abuse.
- 1.5 The DSL shall seek to have a third person present when hearing an accusation where possible, however circumstances and 'trust' considerations will be considered so that the student always feels safe.

2. Staff Awareness

2.1 Awareness of Causes for Concern

Any student may be at risk from other adults and/or children, especially child on child abuse, sexual harassment and sexual violence. This can occur inside or outside of the college environment and staff must be vigilant to ensure the safety of all.

2.2 Staff training in the recognition of signs that should arouse concern is therefore vital.

It is part of the induction training of all new staff and whole staff training days.

Indicators of abuse are varied and there is not an exhaustive list. The 4 main categories of abuse fall under sexual, physical, emotional and neglect, with financial being an important consideration. Further areas include CSE, CCE, FGM, Honour Based Violence, Radicalisation, Peer on Peer, modern slavery, exploitation, domestic violence, financial and organisational. Staff are trained on these as part of the KCSIE 2026 updates and recognise indicators within each category. Please refer to the Harrison College Safeguarding and Student Protection Policy for more detail on each of the above and further detail on child-on-child abuse, sexual harassment and sexual violence procedures as set out in Part One and Part 5 of KCSIE 2026.

This training is regularly updated using bulletins, emails, training sessions and attendance at INSET.

Team meetings (TAC) are held weekly for all staff where CP issues will be raised and used as training and updates.

2.3 Awareness of Procedures

All staff must know how and to whom they should report any Cause for Concern, as outlined in 1.1 above. Staff must act immediately if they see the signs of abuse and pass these onto the DSL immediately and follow the college's referral process. Refer to the Harrison College 'recording a concern' infographic document. They should also be fully aware of the processes and procedures that will follow the raising of any such concern, including those steps that involve any staff member named in any accusation. (see 3.5).

It is vital that these steps are known by all and in advance of any allegations so that no misunderstandings can arise as to how accusations must be followed up. These are outlined in section 4 below for both current and newly appointed staff and are equally relevant to all college staff as it is everybody's responsibility to identify and refer.

Review Date: September 2026

Next Review: September 2027

If staff have a safeguarding concern or an allegation of harming or posing a risk of harm to children is made about another member of staff (including supply staff, volunteers, and contractors), then this should be referred to the principal. Where there is a concern/allegation about the headteacher or principal, this should be referred to one of the Directors. If there is a conflict of interest in reporting the matter to the Principal or Director, this should be reported directly to the local authority designated officer(s) LADO(s). Further details can be found in Safeguarding and Student Protection Policy and on the website in the Whistleblowing procedure.

2.4 Staff Code of Conduct

Staff should never put themselves in a position in which they might themselves be compromised or accused of improper behaviour. Staff should refer to the Harrison code of conduct and staff expectations, as well as the Safeguarding and Student Protection Policy for more details.

- 2.5 All staff will receive a safeguarding presentation each year that will include child protection awareness, e-safety, peer on peer abuse, sexual violence and harassment, child sexual exploitation awareness and a range of other categories that are applicable to recognising indicators of harm (see Safeguarding Policy and Part one update of KCSIE 2026). All staff will further their knowledge through undertaking on-line accreditation for FGM, Prevent, KCSIE, online safety and Safeguarding.
- 2.6 Given that students may choose not to inform staff of their concerns, it is important that they are aware of other agencies available to them for advice. These are made available through the web site, in curriculum and PSHE sessions and are sign posted in the Safeguarding and Student Protection Policy, e-safety Policy and the PDBW Policy.
- 2.7 All staff should be trained to manage a report and follow local processes. This is included in Part One of KCSIE staff training.

3. Due Process within the College

- 3.1 Staff may be alerted to concerns in a variety of ways including student allegation or confession, staff suspicions on over hearing conversations, behaviour changes and alerts from a third party. Any such concern must be acted upon immediately and be brought to the attention of the DSL.
- 3.2 Once the DSL has been notified of an allegation or suspicion, they shall meet with the alleged victim immediately in the presence of another member of staff where possible and if applicable, to clarify the seriousness of the allegation and to ascertain the next course of action. They shall not investigate the matter in any way which might compromise any future enquiry carried out by the authorities, this rules out the use of leading questions. They shall clarify for the student that their foremost priority is their care, and that any allegation of serious harm will have to be passed to the authorities for their investigation who may see fit to inform parents.
- 3.3 The DSL will consider the options available based on the evidence presented and the risk of harm, whether they are in need, or if they are likely to suffer harm. Options may include 1) managing any support for the child internally via the college's own pastoral support processes; 2) undertaking an early help assessment; or 3) making a referral to Local Authority children's / adults social care or 4) referral to the Police
- 3.4 If at any time the DSL is unsure, then they will seek advice immediately from CYPS Children's Services, Early Help, Referral & Response team, MASH, DCST or the Local Authority nominated Child Protection officer.
- 3.5 In the case of students who are over 19 and classed as adults, the DSL will refer to the Adult South Yorkshire Safeguarding services. The DSL will consider the vulnerable status of the student in deciding what and how the information may or may not be shared with others and consider their living situation and reliance on support services already part of their provision. The DSL will consider the Mental Care Act 2005 and the Care Act 2008. Provisions will also come under Part 3 of the Children Act 1989 by sections 96 and 97 of the Children and Families Act 2014.
- 3.6 The DSL and DDSL's are Early Help Lead Practitioners and fully aware of the procedures for liaising with other agencies and setting up an inter-agency assessment as appropriate.

Review Date: September 2026

Next Review: September 2027

- 3.7 Where the student is suffering, or is likely to suffer from harm, it is important that a referral to children's social care (and if appropriate the police) is made immediately.
- 3.8 The DSL shall then contact the Child and Family Unit of the relevant Social Services office and cooperate fully with their advice and actions. This is likely to involve additional contact with other external agencies such as the police or a local hospital. In all cases, the DSL shall also inform the Principal and the Directors.
- 3.9 Where a student may be considered as a Child in Need (CIN) under the Children Act 1989 as a child who is unlikely to achieve or maintain a reasonable level of health or development, or whose health and development is likely to be significantly or further impaired, without the provision of services; or a child who is disabled. Local authorities are required to provide services for children in need for the purposes of safeguarding and promoting their welfare. Children in need may be assessed under section 17 of the Children Act 1989. (Chapter one of Working Together to Safeguard Children provides details of the assessment process)
- 3.10 Where the student is deemed to be suffering harm a referral will be made to the LA. Local authorities, with the help of other organisations as appropriate, have a duty to make enquiries under section 47 of the Children Act 1989 if they have reasonable cause to suspect that a child is suffering, or is likely to suffer, significant harm. (Chapter one of Working Together to Safeguard Children 2026 provides details of the assessment process)
- 3.11 Staff will engage with all relevant agencies and professional assessments will be used to inform the approach to supporting and protecting our students.
- 3.12 The college will consider their responsibilities for sharing information regarding the Data Protection Act 2018 (DPA) and UK General Data Protection Regulation (UK GDPR). DPA and UK GDPR do not prevent the sharing of information for the purposes of keeping children safe and promoting their welfare.
- 3.13 Staff will be proactive in sharing information as early as possible to help identify, assess and respond to risks or concerns about the safety and welfare of students, whether this is when problems are first emerging, or where a child is already known to local authority children's social care. Professional judgement should be used to ensure that the information shared is focused and proportionate
- 3.14 Staff are aware that data protection laws place duties on organisations and individuals to process personal information fairly and lawfully and to keep the information they hold safe and secure.
- 3.15 In the case of proven allegations of *student-to-student* harm, the DSL shall decide how to discipline the student in the light of College Policy and Practice. Students who are victims of sexual violence and sexual harassment will likely find the experience stressful and distressing. This will, in all likelihood, adversely affect their educational attainment and will be exacerbated if the alleged perpetrator(s) attends the same school or college. Section 5 below will also be considered in case the perpetrator themselves is a victim and in need of support or likelihood of harm.
- 3.16 Bullying is not acceptable. It is important to recognise that the college will do everything it can to protect students from bullying and harassment. Bullying may take many forms including cyberbullying, prejudice-based and discriminatory bullying. In this policy we are referring specifically to child-on-child abuse, sexual harassment, sexual violence, cyber bullying and any bullying that may come from victims reporting incidents or from any consequences that the perpetrators may experience.
- 3.17 Should allegations be proven to have been malicious, the DSL or Principal shall deal with the disciplining of the student making those allegations, in light of the individual situation and following college policy.
- 3.18 In the case of proven allegations of *staff-to student* harm, the matter will be dealt with by the principal in line with the College Staff Employment Handbook and in considering LADO referrals if applicable. If the allegations are proved to have been malicious, the principal shall decide whether or not to recommend to the Board of Directors that the guilty party be expelled or disciplined in line with other college policy. Their needs and vulnerability will be considered.
- 3.19 In cases involving sexual abuse, violence or harassment within the college, the DSL will carry out a risk and needs assessment and safety plan which includes the victim(s), the perpetrator, other students,

staff and adults at the college. The wishes of the student will be paramount to hear, but this will be balanced with the College's duty to keep the student from harm and their duty of Care.

4. Record Keeping:

- 4.1 All concerns, discussions and decisions made, and the reasons for those decisions, should be recorded in writing. Information should be kept confidential and stored securely and accessible for only authorised staff. Concerns and referrals will be kept in a separate 'concerns file' (see Safeguarding and Student Protection Policy for more detail).
- 4.2 Records should include: 1) a clear and comprehensive summary of the concern; 2) details of how the concern was followed up and resolved; 3) a note of any action taken, decisions reached and the outcome. If in doubt about recording requirements, staff should discuss with the designated safeguarding lead (or deputy).
- 4.3 DSL and staff will follow the good practice guidelines for recording disclosures as set out in the Safeguarding and Student Protection Policy (section 8.1, 8.2 and 8.3) and the KCSIE Part 5 guidance.

5. Support for the perpetrator:

Children can be exploited by adult males or females, as individuals or in groups, as well as organised gangs and networks. They may also be exploited by other children, who themselves may be experiencing exploitation – where this is the case, it is important that the child perpetrator is also recognised as a victim.

In cases where there is an allegation of the perpetrator being a student at the college then they will also be supported as a potential victim and a further investigation may need to be instigated.

Students at Harrison college may be more vulnerable due to their SEN need; cognitive ability, learning difficulties, communication ability and SEMH concerns. Harrison College will look at each case individually and apply any reasonable adjustments as set out in their EHCP or SEN plan.

The DSL will refer to the applicable government statutory guidance which provides further information for those working with victims and perpetrators of sexual violence or harassment, including LAC, CIN and those on Child Protection Plans.

Further advice

6. Child on Child concerns including harassment and violence (abuse):

All staff should be aware that children can abuse other children (often referred to as child-on-child abuse), and that it can happen both inside and outside of school or college and online. All staff should be clear as to the school or college's policy and procedures with regard to child-on-child abuse and the important role they have to play in preventing it and responding where they believe a child may be at risk from it. It is important that all staff recognise the indicators and signs of child-on-child abuse early and know how to identify it and respond to reports. Staff are aware that this type of abuse is a safeguarding issue for all children (students) involved.

This can include (but is not limited to): bullying (including cyberbullying, prejudice-based and discriminatory bullying); Misogynistic and discriminatory behaviour including racism and faith-targeted abuse attitudes and behaviours; abuse within intimate partner relationships; physical abuse such as hitting, kicking, shaking, biting, hair pulling, or otherwise causing physical harm; sexual violence such as rape, sexual assault, assault by penetration and sexual harassment such as sexual comments, remarks, jokes and online; consensual and non-consensual sharing of nude and semi-nude images and/or videos; causing someone to engage in sexual activity without consent, such as forcing or inciting someone to strip, touch themselves sexually, or to engage in sexual activity with a third party; upskirting which involves taking pictures with the intention of viewing their genitals or buttocks and initiation/hazing

Review Date: September 2026

Next Review: September 2027

type violence and rituals which can cause the victim humiliation, distress or alarm. Addressing inappropriate behaviour (even if it appears to be relatively innocuous) can be an important intervention that helps prevent problematic, abusive and/or violent behaviour in the future.

Serious violence (SV) is an ongoing safeguarding concern and staff play a key role in protecting children from violence and be aware of the signs and risk factors. SV may involve physical assault, the carrying or use of weapons, and potential criminal exploitation. All concerns about a student carrying or intending to use a weapon should be reported to the DSL who will carry out a risk assessment.

7. Sexual Violence, Harmful Sexual Behaviour (HSB) and sexual harassment within College:

The umbrella term 'harmful sexual behaviour' (HSB) is widely used in child protection and applies to behaviour occurring online, face-to-face, or both. HSB should always be considered within a child protection context. Sexual violence and sexual harassment can occur between students of any age at college or outside of college. It can also occur online. It can also occur through a group of students sexually assaulting or sexually harassing a single student or group of students. Sexual violence and sexual harassment exist on a continuum and may overlap, they can occur online and face to face (both physically and verbally) and are never acceptable. It is essential that all victims are reassured that they are being taken seriously and that they will be supported and kept safe. A victim should never be given the impression that they are creating a problem by reporting sexual violence or sexual harassment. Nor should a victim ever be made to feel ashamed for making a report.

Staff should be aware that some groups are potentially more at risk. Evidence shows girls, children with special educational needs and disabilities (SEND) and LGBTQ+ children are at greater risk. Gender questioning and socially transitioning students are at a higher risk of bullying and harassment. All staff should be aware that mental health problems can develop into safeguarding concerns and staff play an important role in recognising the warning signs and identifying students who may be struggling with their mental health.

Staff should be aware of the importance of:

- 1) challenging inappropriate behaviours.
- 2) making clear that sexual violence and sexual harassment is not acceptable, will never be tolerated and is not an inevitable part of growing up.
- 3) not tolerating or dismissing sexual violence or sexual harassment as "banter", "part of growing up", "just having a laugh" or "boys being boys".
- 4) challenging physical behaviours (potentially criminal in nature), such as grabbing bottoms, breasts and genitalia, pulling down trousers, flicking bras and lifting up skirts. Dismissing or tolerating such behaviours risks normalising them.
- 5) targeted interventions such as mentoring or therapeutic support should be put in place.
- 6) recognising that fears about sharing information must not be allowed to stand in the way of the need to safeguard and promote the welfare and protect the safety of students.

Whilst not intended to be an exhaustive list, sexual harassment can include:

Sexual comments, such as: telling sexual stories, making lewd comments, making sexual remarks about clothes and appearance and calling someone sexualised names.

Sexual "jokes" or taunting.

Physical behaviour, such as: deliberately brushing against someone, interfering with someone's clothes (schools and colleges should be considering when any of this crosses a line into sexual violence - it is important to talk to and consider the experience of the victim) and displaying pictures, photos or drawings of a sexual nature.

Online sexual harassment. This may be standalone, or part of a wider pattern of sexual harassment and/or sexual violence. It may include consensual and non-consensual sharing of nude and semi-nude

images and/or videos. Taking and sharing nude photographs of U18s is a criminal offence. Sharing of unwanted explicit content. Upskirting (is a criminal offence); Sexualised online bullying. Unwanted sexual comments and messages, including, on social media. Sexual exploitation; coercion and threats and coercing others into sharing images of themselves or performing acts they're not comfortable with online
Displaying pictures, photos or drawings of a sexual nature

Section 6 and 7 above are found in more detail on pages 41-43 in the Safeguarding and Student Protection Policy and on page 9 and 10..

9. Wellbeing

By implementing these practices, Harrison College aims to create a supportive and inclusive environment for all students ensuring their safety, well-being, and equal opportunities to succeed. All staff are aware that mental health problems can develop into safeguarding concerns.

Harrison College takes account of this guidance and helps to prevent mental health problems by promoting resilience as part of an integrated, whole college approach to social and emotional wellbeing, which is tailored to the needs of our students. This is provided within our curriculum offer to all Harrison College students
